As a major showcase of the **'Made In India' Campaign, Trucking Cube** a new age packing & moving Innovation from the Agarwal Movers Group would deploy 500 Trucks owned by ex-army personnel in their fleet. Their engagement with Trucking Cube would enable the ex-servicemen to be entrepreneurs earning a minimum income of INR 50,000 month on month.

As an appeal, **Ramesh Agarwal, Chairman and Managing Director Agarwal Movers Group** requested the armed forces to allow the ex-servicemen buy a truck with an excise

exemption hence making the sale affordable.

"The ex-servicemen are trained to run operations and are coached on latest technology advances allowing them to be an entrepreneur. Owning a truck will allow the ex-serviceman to be a part of the 'start-up' culture & help them contribute productively to the logistics industry which is the very DNA of a country's infrastructure framework."

Agarwal Movers Group earlier announced that they would invest 100 crores (USD 15 million) in Trucking Cube which cements its leadership in its house hold & commercial relocations with a Zero Loss Zero Damage guarantee. Trucking Cube has been operational since July 2015.
